

Consolidated as a reference meeting of Nanoscience and Nanotechnology (N&N) in Spain, the conference NanoSpain 2022 is not limited to a conventional presentation of ideas or results, but seeks to deepen the common themes among the participants, also serving as a link between industry and researchers.

Since 2004, year the event was launched, NanoSpain conference series aims to agglutinate and coordinate the efforts made in the field of Nanoscience & Nanotechnology by Spanish groups from universities, research institutes and companies.

NanoSpain events facilitate the dissemination of knowledge and promote interdisciplinary discussions not only in Spain but among the different groups from Southern Europe.

Over the past years, NanoSpain conference became more and more multidisciplinary and 2022 won't be an exception. NanoSpain 2022 will cover a broad range of current research in Nanoscience and Nanotechnology.
