Who is EQUIS European University

Alliance members

In Association with

Alliance Members

"Where Knowledge, Technical Innovations and Social Commitment Meet" is the motif of this alliance, led by Universidad Politécnica de Madrid, that brings together nine of the most prestigious universities of Europe. All with different sizes, history and disciplines but same goal – to transform European Tech Higher Education.

Budapesti Műszaki és Gazdaságtudományi Egyetem

École des Ponts ParisTech
Ecole des Ponts ParisTech, created in 1747 under the name Ecole Royale

What are the EELISA communities European University

Diverse and ever-expanding nodes where education, research, professional experience, and societal challenges merge.

The EELISA communities are mission-driven working groups that bring together students, teachers, and researchers from all partner universities with prestigious professionals, grassroots organizations, citizens, private companies, and public institutions to find innovative solutions to real-world challenges.

Each community will define its main elements: mission, challenges, people/organization, activities, and evaluation criteria.

23rd to 27th January 2023

**Welcome to the environment in which you will be operating in the coming years
of your professional career: SUSTAINABLE&DIGITAL BUILDINGS**

THINK TANK ESA-ESAC - SUSTAINABLE BCC : SUSTAINABLE BUILDINGS

The Activity:

The ESA-ESAC - SUSTAINABLE BCC think tank is an educational activity to promote innovation and generate fresh ideas to launch a comprehensive sustainable refurbishment of the European Space Agency (ESA) building “A” in Spain. Together with ESA-ESAC (partner of SUSBCC) we will organise a high impact activity consisting of a large think tank, with the participating students and the support of professors, researchers, and professionals, to undertake a comprehensive rehabilitation operation in the spirit of the New European Bauhaus and with the triple bottom line approach of sustainability (social, economic, and environmental).

This activity is a very good opportunity for students who participate both in person and virtually, to acquire a global and integrative vision from the spirit of the New European Bauhaus and sustainability, gaining awareness and commitment to social, economic, energy, and environmental concerns, as well as discovering the potential offered by current digital trends to support and promote them from a perspective of efficiency.

This activity will take place in a creative and collaborative international environment with the participation of an estimated 300 international students and more than 100 international professors, researchers and professionals.

[https://www.esa.int/About Us/ESAC](https://www.esa.int/About_Us/ESAC)

THINK TANK ESA—ESAC - SUSTAINABLE BCC : SUSTAINABLE BUILDINGS

What participating students gain:

Lifetime experience in Madrid

Enjoy a special and exciting experience collaborating with other EELISA students in Madrid, working together with our experts and professionals, enjoying our party, with a visit to the control and monitoring headquarters for ESA's space telescopes and planetary missions... Unforgettable

Knowledge:

Students will work in a fully international event conducted in English. Students will receive an extensive background information with knowledge on all topics related to social, economic, energy and environmental sustainability, digital tools, and integration according to the New European Bauhaus for more efficient and sustainable buildings

Skills and competences:

Students will develop multiple skills and abilities beyond the linguistic ones, such as learning to think analytically, working and reflecting in diffuse environments, teamworking, collaborative work, ability to reach agreements, capacity for integration and synthesis, and **multidisciplinary enrichment** by the participation of students, professors, researchers, and professionals from many different disciplines (architects, engineers, economists, sociologists, facility managers, psychologists, ...).

Global awareness and commitment

Most importantly, global awareness and commitment to the need to foster more efficient and sustainable buildings, cities and communities. Welcome to the action!!

Acknowledgements:

Participating students will have a recognition of 2 ECTS credits of free configuration by the UPM (local validation to be carried out in each home university by students).

Students will receive from 2 to 4 badges for their EELISA credentials according to their active fully participation in the ESA-ESAC - SUSBCC Think tank.

Students participating in at least two workshops of your choice will receive 1 badge (no ECTS recognition)

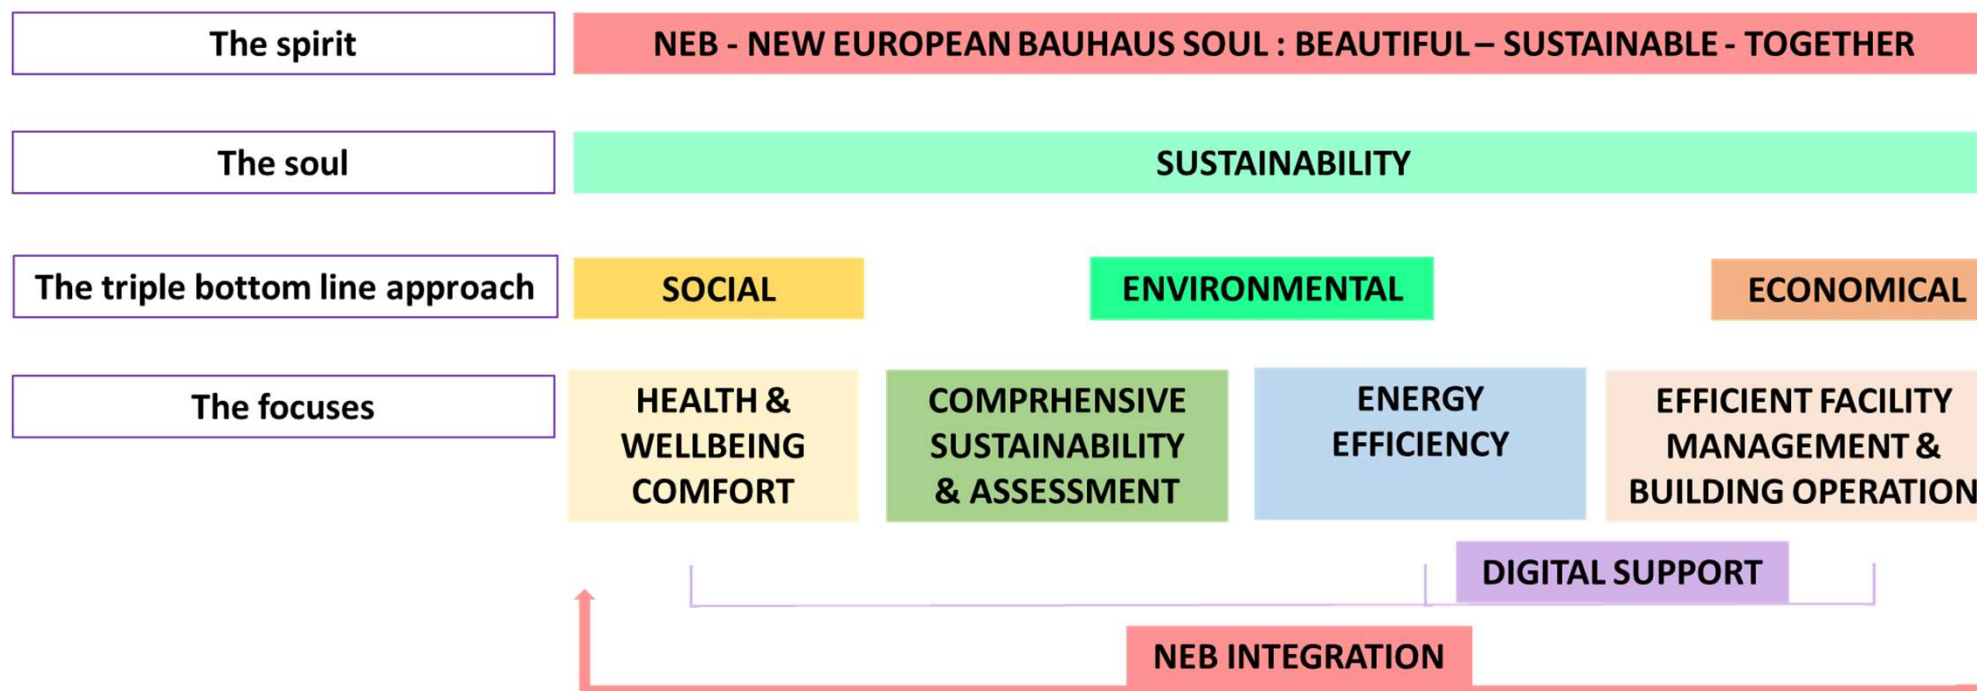

Students will be welcome as member of the EELISA community SUSTAINABLE BUILDINGS CITIES AND COMMUNITIES.

The Think Tank:

The development of this ESA-ESAC-SUBCC think tank will take place in a hybrid format in the last week of January 2023 (23-27 January) at the ESA-ESAC headquarters in Villanueva de la Cañada, with the participation of around 300 international students (50 on-site). The scope of development will cover the entire academic year 2022-2023, with activities in both the first and second semester.

The think tank is actually composed of **6 different think tanks: 4 working in thematical parallel sessions** from the three pillars of sustainability, **1 cross-cutting** think tank on digitalisation, and **1 collective think tank on integration** through the New European Bauhaus Spirit.

The Workshops:

Each of the parallel think tanks consists of **8 thematic workshops of 2h each** in which the different **collaborative working groups** (3 to 6 per parallel think tank) will be proposed **specific challenges** to discuss and generate ideas, analysing and trying to reach common conclusions. In addition to this, there will be four workshops for analysis, recapitulation, and integration of conclusions and lessons learned.

Prior to the development of the activity, the students will have access to a repository of teaching and informative material on each of the topics under analysis, in the form of a flipped classroom.

Every thematic workshops of each of the think tanks will be organised with 30 minutes of a master class to unify criteria, resolve doubts and define the specific challenges proposed to each working group. These challenges will be the object of collaborative work and reflection for 1 h (mixed face-to-face-virtual groups) and an additional half hour of sharing the findings and conclusions consolidated in the workshop.

The integration workshops are to share the partial and final conclusions of each of the think tanks in the different thematic workshops.

PARALLEL THEMATIC THINK TANKS

Think tank	COMPREHENSIVE SUSTAINABILITY	HEALTH AND WELLBEING	ENERGY EFFICIENCY	EFFICIENT FACILITY MANAGEMENT
Workshops	Code	Code	Code	Code

(*) Since we are in the planning and development phase, the title and/or content of some workshops may be adjusted.

THINK TANK ESA-ESAC - SUSTAINABLE BCC : SUSTAINABLE BUILDINGS

The Agenda:

Students who register for the activity (fees' free) can apply to participate in the entire think tank in face-to-face or virtual format, prioritising one or more of the parallel think tanks (2 ECT+2-4 Badges). Students will also have the opportunity to only sign up for individual workshops of their interest (with 1 badge for 2 to 3 workshops, and 2 badges for 4 workshops or more). The agenda scheduled for the think tank is:
